

May 26, 1964

Dr. Abe Silverstein
Director
Lewis Research Center
National Aeronautics and Space Administration
Cleveland, Ohio

Dear Abe:

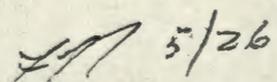

I want to take this opportunity to thank you for the work of the personnel of the Lewis Research Center in contributing to the success of the NASA Field Inspection and the Open House Program, and to tell you that we appreciate very much your cooperation in presenting the excellent propulsion exhibit. Jim Modarelli and Lyndell Manley did a wonderful job and I know that many others contributed back at Lewis.

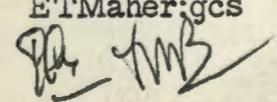

Mr. Paul J. Kick rendered excellent service in the Technical Illustrating Section during his assignment at Langley and we certainly appreciated his help.

It was a pleasure for our staff members to work with the representatives of Lewis, and we thank them for their pleasant and helpful cooperation.

The 1964 NASA Field Inspection of Advanced Research and Technology was attended by more than 1600 guests from industry, government, educational institutions, press, and visitors from the embassies of foreign countries. On Saturday, May 23, 1964, an Open House was held for the local community during which approximately 15,000 persons visited Langley and inspected the exhibits.

Sincerely yours,

 5/26
Floyd L. Thompson
Director
